for 1942

ROSES

ARE ESPECIALLY SELECTED TO PRODUCE IN YOUR GARDEN: ONLY VARIETIES RECOMMENDED FOR SOUTHERN CALIFORNIA ARE OFFERED. BE SURE OF LUSCIOUS FRUIT, EXQUISITE ROSES CHOOSE YOUR FAVORITE VARIETIES OF THE FOLLOWING.

ALMONDS

NE PLUS ULTRA

Almonds grow well without Summer irrigation therefor succeed where a great many other varieties fail. These almonds are attractive in appearance, soft-shelled, long and large; trees are good producers. A pollenizer for Non pareil.

NON PAREIL

This is the thin shelled variety bearing uniformly heavy crops of high quality nuts. Kernel is large and smooth. Produces best with Ne Plus Ultra.

APPLES

WINTER BANANA

These delicious, pale waxen yellow fruits with handsome red blush are attractive and large. This is the best apple for Southern California.

APRICOTS

BLLENHEIM

Very similar to the Royal, fruits are attractive, well-formed and delicious. Heavy producer.

ROYAL

Finest Apricot for home orchards. Orange-yellow skin, medium sized, sometimes with red cheek. Flesh is rich and sweet, deep orange.

CHERRIES

ENGLISH MORELLO

This is the "pie" cherry recommended for the coastal sections where the sweet cherries do not bear. The handsome fruits are large dark wine-red, flesh tender.

FIGS

BROWN TURKEY

Large purplish-brown fruit with fine-grained, strawberry-red, sweet and juicy flesh and a habit of producing heavy crops, make this the finest fig for Southern California Gardens.

KADOTA

The finest of the white figs. Flesh is pale amber, skin waxy, yellow-white. A prolific bearer and an excellent fig for jams.

BLACK MISSION

A dark purple-black fig with brownish red flesh. Was introduced into California by the Mission Fathers, hence the name. Produces more than one crop a year.

NECTARINES

GOLD MINE

A white fleshed "smooth skinned peach." Delicious home-orchard freestone. Good producer.

PEACHES

B A B C O C K

Extremely high quality peach not bothered by delayed defoliation. Has juicy rich flavored white flesh and smooth red cheek. Late June.

L U K E N ' S H O N E Y

Greenish-white fruit with white flesh and abundant sweet juice. Dependable bearer also resists delayed defoliation. A smaller peach than Babcock. August. Freestone.

CITRUS

GRAPEFRUIT

M A R S H S E E D L E S S

Few seeds, thin rind, abundant juice and very fine flavor make this the best variety. Fruit is large; tree vigorous, compact, a heavy bearer.

LEMONS

E U R E K A

Bears large crops of good sized, juicy lemons. Not as hardy as the Meyer Lemon but makes a larger tree. Ripens fruit all year with largest crop in Summer.

M E Y E R

This semi-dwarf variety bears right after planting, the large and darker fruit than the Eureka lemon is ripened throughout the year. Flowers are large, sweet scented. Available in both bush and tree form.

LIMES

B E A R S S S E E D L E S S

Produces fruit quickly and bears heavy crops. Largest and finest of all limes. Ripens most of fruit in Summer. Tree is large, slightly more hardy than most varieties

Rio Oso Gem PEACH

Splendid yellow-fleshed freestone, brilliant crimson fading out to orange-red. Fruit very large, the flesh is firm; excellent flavor. August. Add ten cents royalty.

PLUMS

I M P R O V E D S A T S U M A

Most popular deep red plum. Firm, juicy and of fine flavor. The fruit is large and prized for preserves.

S A N T A R O S A

Large amber-red fleshed, juicy. Widely planted and one of the handsomest plums. Late June.

ORANGES

W A S H I N G T O N N A V E L

California's well known navel orange. The seedless variety harvested in the Winter. December to April.

V A L E N C I A

California's Summer orange; has abundant juice, is of medium size with few seeds. This variety is the largest growing of the Citrus. April to October.

TANGELOS

T A N G E L O

Cross between tangerine and grapefruit (pomelo) with golden yellow glossy skin, delicious orange-red juice. February to May.

TANGERINES

M A N D A R I N

Large type of tangerine with rougher skin. Fruit is deep orange with few seeds. Bears large crops, even when young. March to August.

AVACADOS

FUERTE

The finest Avacado for home planting in Southern California. Fruit is elongated, pear shaped, medium sized with a smooth green, leathery skin. Creamy yellow, buttery flesh. Ripens fruit in the Winter.

WALNUTS

PLACENTIA

These smooth rounded oval nuts have a thin strong shell. This variety is the most satisfactory for Southern California. These trees bear when very young, and produce heavy crops. Priced below.

Spring FLOWERING TREES

Nothing equals the Flowering Apricots and Peaches for Spring Color. They grow well in all Southern California gardens, producing a great profusion of bloom over a long period. The fragrant blossoms last a long time when cut. Herald the event of Spring in your garden with a flowering tree.

FLOWERING APRICOT - CHARLES ABRAHAMS

This exceptional variety produces a profusion of large, brilliant red flower buds which open into huge double flowers of carmine pink.

FLOWERING PEACHES

We have three of the finest varieties of this flowering tree which is highly prized for its superbly formed blossoms, lasting qualities and profusion of bloom. Early pink, Early red and White.
